

We don't sell carrots

or any other food

to feed to ponies

Feeding ponies and donkeys is **BAD** for them:

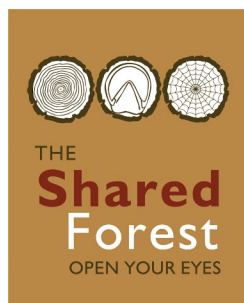

- It keeps them away from grazing the natural grasses and herbs that are best for them
- It encourages them to hang around humans and on roadsides where they are in danger from cars
- It makes them greedy for human food - including picnics

Feeding ponies and donkeys is **BAD** for people, too:

- It makes some ponies and donkeys pushy and aggressive, so they are a risk to people - especially small children

So, please don't feed our ponies **ANYTHING!**
